SECTION THE WIND TAIL, A NEW TYPE OF AIRSHIP

WIND TAIL

—ELEVATION OF WIND TAIL—

—PLAN OF WIND TAIL—

—PLAN OF WIND TAIL—

1. The Wind Tail is a new type of airship, designed for long-distance travel. It is a long, narrow hull with a central cabin and two large, rounded, bulbous sections at the front and rear. The hull is supported by a series of struts and a central keel. The large, rounded sections are designed to provide buoyancy and stability. The central cabin is designed for passengers and crew. The Wind Tail is a new type of airship, designed for long-distance travel.

*Sketch of the building as shown. The sketch is a preliminary
of the design.*
